

Information Technology Manager

The Lancaster County Solid Waste Management Authority (LCSWMA) is seeking qualified candidates for the full-time position of Information Technology (IT) Manager. This position is responsible for the day to day management of the technology of LCSWMA, as well as managing the personnel within the IT department. The IT Manager will work with all departments within LCSWMA to ensure that technology needs are being met, and ensure that the IT staff is providing the level of support that is required to operate efficiently. Additional responsibilities include: managing the relationship between LCSWMA and technology related subcontractors or third parties, designing training courses as necessary, and developing long term planning and strategies so that technology is used in an efficient and productive manner. The IT Manager will be an innovative thought leader who will be strongly aware of the overall IT vision of LCSWMA so that he or she can evaluate and implement the technology needed presently and in the future.

The ideal candidate will possess a Bachelor's Degree in Computer Science, Information Systems, or related majors. 10 years of related work experience, with at least 5 years in a supervisory role. Any suitable combination of education and work experience will be considered.

Additional requirements include:

- Strong knowledge of LAN technologies
- Knowledge of Microsoft Active Directory and Microsoft Exchange
- Knowledge of Microsoft Windows Operating System, Novell NetWare, Networking and additional business applications
- Technical skills as well as interpersonal relationship management expertise
- Strong communication and relationship development skills among senior management and staff members

Competitive compensation and benefits package provided.
