Why is LCSWMA increasing disposal rates?

- LCSWMA's refuse rate remained at \$73.00/ton from 2009 to 2019.
- Heightened inflation is a contributor to increased operating costs including higher fuel prices, labor wages and unexpected disruptions in supply chains.
- LCSWMA has not been immune to these challenging economic times and continues to focus on operating in a fiscally responsible manner while maintaining high standards of customer service, safety, innovation and environmental stewardship.

To maintain LCSWMA's unique and award-winning Integrated System, the Authority must invest more than \$17 million per year over the next five years. Significant investments will:

- Ensure future landfill capacity
- Maintain and enhance waste-to-energy operations and capacity
- Allow for environmental upgrades across LCSWMA's waste management and renewable energy facilities
- Provide operational improvements to LCSWMA's Integrated System

Disposal fees are approximately 24% of a resident's trash bill

Why is LCSWMA imposing a \$20 penalty for open loads that are not secured by a tarp?

1. It protects the HEALTH and SAFETY of our community

Unsecured loads and debris in the road led to 200,000 crashes between 2011-2014

2. It Protects the ENVIRONMENT

As a nation, we spend \$11.5 billion a year combating litter, 40% of which comes from unsecured loads

3. It's the LAW

Pennsylvania's state and federal requirements are as follows:

Loads must be covered with a securely fastened water-resistant cover that eliminates potential for littering and other nuisances. 25 Pa. Code §§ 285.211(a) and 299.211(a)

Please secure your open load! It prevents litter and saves lives.
